### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, 7-18 and 21-28, drawn to a process for producing a dust mite allergen via Agrobacterium, classified in class 435 subclass 71.1.
  - II. Claims 1-4, 7-18, and 21-28, drawn to a process for producing a dust mite allergen via direct DNA uptaking, classified in class 435, subclass 69.3.
  - III. Claims 1-28, drawn to a process for producing a dust mite allergen via ZYMV, classified in class 435, subclass 235.1.
  - IV. Claims 1-28, drawn to a process for producing a dust mite allergen via TMV, classified in class 435, subclass 235.1.
  - V. Claims 29-34, drawn to an antigenic composition, classified in class 424, subclass 278.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation. These vectors utilize different mechanisms and materials for expression.
3. Inventions V and I-IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the

Art Unit: 1638

process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process. The dust mite allergen can be obtained from its source. Alternatively, the method can be used to make a different protein.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different searches, and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong T. Bui whose telephone number is 571-272-0793.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anne Marie Grunberg can be reached on 571-272-0975. The fax phone
